CHP UNIT SUPPLY FOR TEPLÁRNY BRNO S.A.

Published on the 5th of March 2018

We are proud of the fact that our cogeneration units of the KE-MNG eco series are used in the framework of the Brno central district heating system. Because the installation of CHP UNIT in urban areas has special requirements in terms of emission limits, the units are supplied in "eco" design. A part of provided services include regular service and remote monitoring of the unit.

Name of the contract **PAVLOVSKÁ**
